

## SPECIFICATIONS

### Product Specifications Material:

- Ethylene-Vinyl Acetate (EVA) Vapor

### Barrier:

- Integrated clear vapor barrier for added moisture protection

### Roll Size:

- 100 sq. ft. per roll • Dimensions: 4 ft x 25 ft • Thickness: 1.5 mm

### Installation Features:

- Self-sealing lip with built-in tape system for fast, secure installation
- Suitable for all floating LVT flooring applications

### Acoustic Performance:

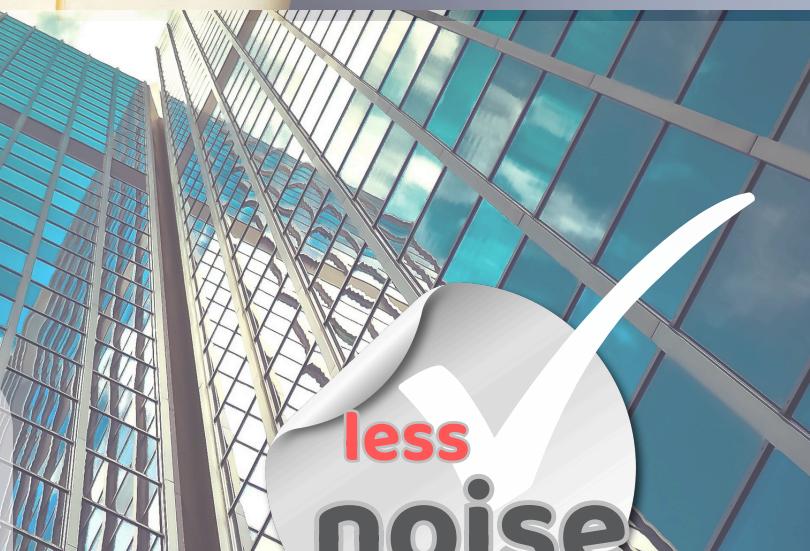

STC (Sound Transmission Class):

- 70 (with suspended ceiling)
- 52 (without suspended ceiling)

### IIC (Impact Insulation Class):

- 71 (with suspended ceiling)
- 53 (without suspended ceiling)

### Laminpad LVT Soundproofing Underlayment Laminpad LVT

Soundproofing is a premium EVA (Ethylene-Vinyl Acetate) underlayment engineered specifically for floating Luxury Vinyl Tile (LVT) flooring systems. Its 2 mm high-density foam layer delivers exceptional cushioning, superior stability, and advanced noise reduction. Designed to elevate both comfort and performance, Laminpad enhances every step by improving acoustic quality and providing reliable support under your LVT floors. Create a quieter, more comfortable environment with Laminpad's next-generation soundproofing technology.
